

BRAND GUIDE · 2026

The Manager

Identity system for Manager: the protocol that auto-converts tokenized stocks into \$INDEX, or the tokenized stock of your choice.

01. MARK

The tile mark

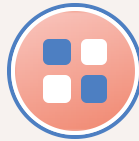

Four tiles set on a strict 2×2 grid, split on the diagonal between Manager Blue and Stone. It reads as a portfolio, a ledger and a set of managed assets at once: simple enough to render at 16px, distinct enough to trademark.

Clear space: 1 tile-width on every side. Never below 24px.

Voice

Direct, factual, no hype. Manager explains what the protocol does in one sentence: never "revolutionary", never emoji.
